

EDUCATION

Dartmouth College	Hanover, NH
Master in Engineering Management (MEM)	Sept 2025 - Nov 2026 (Incoming)
SRM Institute of Technology	Chennai, India
Bachelor of Technology - Computer Science; GPA: 3.98	June 2018 - May 2022

SKILLS SUMMARY

- **Languages & Frameworks:** Python, SQL, Pandas, NumPy, SVM, KNN, XGBoost, NLP, LangChain
- **Product Strategy:** Product Roadmapping, GTM Strategy, Competitor Analysis, Architecture Design
- **User-Centered Execution:** User Research & Interviews, MVP Development, Feedback-Driven Iteration, Agile Development
- **Cloud & GenAI Tools:** AWS (Bedrock, Lambda, EC2, Redshift, ECS, API Gateway), RAG, VectorDB, Prompt Engineering
- **Analytics & Visualization:** Power BI, Excel, Figma, R

WORK EXPERIENCE

TECHNICAL PRODUCT CONSULTANT - BIOGEN GEN AI ARCHITECTURE DESIGN | DELOITTE |

November 24- April 25

- Led **current state assessments** and discovery interviews across 15+ GenAI driven use cases in Biogen.
- Built **product requirement blueprints** by documenting user needs, tech preferences and design workflows .
- Designed 100+ **GenAI system architectures** with AWS services to define end-to-end product flows using **Figma**.
- Supported in devising product roadmaps and T-shirt sizing models improving scoping accuracy by ~25%.
- Assisted decision-making by advising on **cloud strategy** and preparing planning artifacts for product lifecycle.

PRODUCT OWNER - HACKAZON CTF | DELOITTE |

December 23- June 25

- **Owned Deloitte’s cyber hackathon product** (Hackazon), deployed across U.S. universities and internal events.
- Conceived and **developed 30+ Python-based challenges** across GenAI, data science, cryptography and more.
- Conducted **market research** for competitor analysis to identify product gaps and define unique selling points.
- Devised **GTM strategy with clients** to define challenge progression, user onboarding, and overall product flow.
- Analyzed **user personas and pain points** to align challenge content with audience skill levels and event types.
- **Gathered user feedback** to iterate on challenges, improving engagement and production efficiency by ~65%.
- Led **Agile Development** using Azure Boards, managing user stories, tasks for timely delivery of challenges.

DATA ANALYST - KYNDRYL IMPLEMENTATION | DELOITTE |

November 22- November 23

- Performed data analysis on 10,000+ contracts through **optimized SQL queries** (CTEs, Window Functions).
- Utilized Python libraries such as **Pandas and NumPy** for data cleaning and dataset transformations.
- Utilized **ML models (SVM, KNN)** to categorize contracts and improved model accuracy from 63% to 90%.
- Automated keyword extraction using **NLP** (TF-IDF, BERT) reducing processing time from 6 hours to 2.5 hours.
- Developed interactive **Power BI dashboards** with DAX and leveraged **Excel** to extract actionable insights.

PROJECTS

Commercial Health Agent - AWS Gen AI Chatbot for Healthcare Analytics

November 24 - June 25

- Built a GenAI-driven clinical chatbot on AWS Bedrock, Lambda, and EC2, delivering real-time healthcare intelligence.
- Scaled product from single-agent to multi-agent architecture, enabling specialized agents for clinical insights and visualization.
- Pitched product to internal stakeholders, secured AWS funding, and adoption interest from Deloitte’s Converge Health.

Music Monsoon - Weather Based Music Recommendation System

September 24 - October 24

- Identified user pain points through research on gaps in personalized music experiences linked to weather conditions.
- Designed and developed a web app recommending music genres based on real-time weather data using a CNN model.
- Validated MVP functionality through peer demos, gathered feedback and planned next-phase personalization improvements

What’s Cooking - GenAI Powered Recipe Generation Platform

October 24 - November 24

- Conducted user interviews to uncover core challenges users face in selecting meals based on available ingredients.
- Built a GenAI-powered recipe generator suggesting personalized meal options and predicting cuisines using XGBoost.
- Estimated potential time savings and improved meal planning efficiency based on early user feedback analysis.
